

SCHOOL PACKAGES: WTE 2.0

The most advanced educational writing software on the planet

FREE WRITER

STORYBOARD WRITER

REPORT WRITER

For the first time, an educational writing tool that uses Artificial Intelligence to assess, improve, and encourage student writing ability.

Individualised Learning Experience: When the student first begins their WTE 2.0 journey, they complete a diagnostic test which assesses their current writing capabilities. This data is used to customise the learning experience and recommends achievable progressions for the student.

Writing Tools: The new writing tools provide a seamless experience from when the student writes their first simple sentence through to churning out a killer 8-paragraph essay complete with a Slam Dunk Paragraph. Artificial Intelligence provides instantaneous feedback on the students' assessment—whether it be the next Keats poet in your classroom, or Einstein's prodigy writing up their experiment notes.

Instantaneous Feedback: The instant feedback tool is a newly-designed smart tool. Chuck away your red pens. And let the software help students to improve their writing before you read it as a teacher.
